-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 January 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-3 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-3 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 21 July 2003 is/are: a) ☐ accepted or b) ☒ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

This is the first Office Action for application number 10/624,152 Modular Accessory Holder, filed on 7/21/03. Claims 1-3 are pending.

Election/Restrictions

Claims 4-10 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 1/24/05.

Applicant's election with traverse of the election requirement in the reply filed on 1/24/05 is acknowledged. The traversal is on the ground(s) that all of the species are obvious over one another. This is not found persuasive because the species contain a fishing pole holder, a cup holder, a speaker, a light, a GPS unit and a locking means all which create a burdensome search for the examiner.

The requirement is still deemed proper and is therefore made FINAL.

Claims 4-10 have been cancelled pursuant the amended claims, dated 1/24/05.

Non-elected claims have the status identifier of (withdrawn). The full text should appear behind the claim.

Information Disclosure Statement

The information disclosure statement submitted on 7/21/03 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement has been considered by the examiner.

Drawings

The drawings are objected to because in Fig. 3 front wall 30 appears to be pointing to the slot 28. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by United States Patent No. 2174140 to Schofield.

The patent to Schofield discloses a device having a receiver (10) fixedly attached to a fixed point, wherein the receiver has a top surface (See Drawing Below), and an open front, a slot opening in the top surface and descending downward therefrom having an upper portion and a lower portion, wherein the slot is bounded by a back wall (12), a front wall (14), and first and second side walls (See Drawing) which taper toward each other so that the upper portion is wider than the lower portion of the slot.

Art Unit: 3632

Shofield also discloses a modular mount (17, 18', 19, 20) including an attachment means (See Drawing Below), a plate (See Drawing), a tang (See Drawing) having a back wall, a front wall, a first and second side wall, the tang descending from the plate first and second steps (20) proximate to a junction between the tang and the plate, wherein the first and second side walls of the tang taper toward each other so that the upper portion of the tang is wider than the lower portion.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3632

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over United States Patent No. 2174140 to Schofield as applied to claim 1 above, and in view of United States Patent No. 5321904 to Benson.

Schofield discloses applicant's basic inventive concept including teaching that the mounting means has a hollow tubular rod holder attached to the modular mount. Shofield does not specifically teach that the device holds a fishing rod.

Benson teaches a modular mount having a mounting means (10) with a hollow tubular rod holder (See Fig. 11) with a fishing rod (64) mounted in the device, the rod used to catch fish. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made from the teachings of Benson to have used a fishing rod with the holder as taught by Shofield, in order to catch fish.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
